Moderator Certification Program

21st century students learn differently.
21st century educators need the skills to reach them.

Ongoing professional development is critical tor today's educators and trainers. And honing online teaching skills should be a key component of any continuing education program. After all, isn't it about being the best you can be?

The **Elluminate Moderator Certification Program** is designed to help you develop the skills you need to excel in the virtual classroom. Learn how to use Elluminate *Live!*® to deliver interactive and engaging online learning experiences for your participants. Develop a superior command of the Elluminate *Live!* moderator tools and feature set, and apply these tools to create learner-centric online classrooms that will increase learner achievement and satisfaction.

Elluminate and the University of California at San Diego have partnered to offer an accredited 10-hour program for those who are passionate about online teaching and learning. For both individuals and academic organizations, the program is available as a public or private course, online or onsite. **Whatever option you choose, you earn one academic or continuing education credit.**

Taught by Elluminate trainers in the Elluminate *Live!* virtual classroom, the program offers multiple perspectives, including instructor-led presentations, small group collaboration, and in-class cooperative learning. Plus, you'll share ideas and experiences, tips and techniques, learning content, best practices, and more via **LearnCentral™**, the social learning network sponsored by Elluminate.
