

Illuminate Bridge for Moodle

Seamlessly integrate synchronous content and collaboration into existing coursework

Illuminate brings you an open-source Moodle integration that easily and seamlessly bridges the gap between asynchronous and synchronous eLearning.

With the Illuminate Bridge for Moodle, you can combine open-source Moodle technology with Illuminate *Live!*—the Internet-based, real-time eLearning and web collaboration tool that ensures a superior user experience regardless of computer platform or connection speed.

For Instructors and Staff

Already using Moodle for your distance learning? Now you can schedule and add Illuminate *Live!* online sessions to existing courseware. You can even record your classes for those who missed the live session or want to review. And your students can launch a synchronous Illuminate *Live!* session directly from Moodle with a single click.

Elluminate Bridge for Moodle:

- Seamlessly integrates into the Moodle environment you already know
- Allows you to schedule, access, and record sessions directly from Moodle, with no new training needed on another application
- Enables you to manage your own class recordings, with no additional help from IT staff

For IT and Technical Staff

Need deployment flexibility and simplicity? You have it with Elluminate Bridge for Moodle. The integration quickly and securely installs into your existing Moodle environment. And it connects to Elluminate *Live!* application you already host on your own server or as an ASP service with Elluminate.

Elluminate Bridge for Moodle:

- Leverages existing student and staff directory structures already accessed through Moodle, with no parallel directories to set up
- Adds few user interface additions to Moodle, allowing staff and students to quickly embrace real-time classes through the familiar Moodle interface with minimal IT training
- Allows other Elluminate Bridge integrations or campus directories to be used at the same time as Moodle, like Blackboard or Active Directory
- Is open source, enabling your team to better evaluate the connection between your campus Moodle and the Elluminate *Live!* ASP services or server you have deployed on campus.

For CIOs, Provosts, and Other Administrators

Elluminate understands that your students expect real-time classes and collaborations as part of today's academic environment. Plus, we know you've made a significant investment in your Moodle deployments, training, and staff buy-in. The Elluminate Bridge for Moodle is an excellent way to cost effectively extend your existing eLearning investment to include synchronous components.

Elluminate *Live!* and Elluminate Bridge for Moodle:

- Are used successfully enterprise wide by academic institutions of all levels for direct instruction, professional development, collaborative meetings, remote guest lecturers, and more
- Are fully supported by Elluminate's 24x7 support staff.
- Include professional services, training, and implementation help from the experienced Elluminate Team

Don't wait. Integrate Elluminate *Live!* and Moodle today!
