

## Engage more people. Encourage more collaboration. Experience more learning.

For today's online learning to be effective, it must be accessible, engaging, and collaborative. A virtual environment for real-time teaching and learning is key. But other modalities, such as on-demand and mobile learning, are equally important. The eLearning landscape is evolving, and Elluminate continues to lead the way. We call it EDU 2.0.

Built on our unique *No User Left Behind*<sup>™</sup> technology, the Elluminate Learning Suite<sup>™</sup> delivers the accessibility, functionality, and interactivity you need to reach and engage more learners, facilitate formal and informal learning, promote a culture of collaboration, and much more.

Learning is all about the experience. And there's never been a better time for you to experience the Elluminate difference. Introducing the newest additions to our learning-edge suite of products: **Elluminate Live! V9** and **Elluminate Publish! V2**.

### **Educators: Reach and Engage More Learners Live and On Demand**

Expand your reach with integrated teleconferencing and in-session invitations via IM or email. Deliver more engaging sessions with real-time, multipoint video. Plus, meet the needs of today's mobile learners with on-demand interactive recordings and multimedia podcasts.

### **Administrators: Promote Culture of Collaboration Across the Enterprise**

Whether it's collaboration by design or just in time, Elluminate *Live!* enables you to get the right people together at the right time with in-session invitations and integrated teleconferencing. Reach colleagues instantly wherever they are, even if they don't have Internet access, to get the work done.

### **Technologists: Ensure Accessibility and Flexibility for All Users**

When we say *No User Left Behind*<sup>™</sup>, we really mean it by offering you more choice and convenience. Enable your users to interact in the way that's best for them: VoIP, telephone, live video or chat. And multimedia podcasts capture all audio, including teleconferencing and closed captioning.

### **Trainers: Facilitate Formal and Informal Learning Anywhere, Anytime**

While Elluminate *Live!* is perfect for formal lectures and presentations, the virtual classroom also encourages a learner-centered approach with tools that meet the needs of auditory, visual, and kinesthetic learners. Plus, facilitate ad hoc learning at the student's convenience.
