

Creating a Podcast from an Elluminate Recording for PC Users

This guide is intended to step the end user through the process of converting an Elluminate *Live!* recording into a Video Podcast or a traditional audio Podcast. Brand new (October 2006) from TechSmith is Camtasia Studio 4 and the option to produce directly to the video podcast format of MV4 and to the audio podcast format of MP3. What a time saver and great new tool. For more detailed steps on this process, please refer to **Podcasting with Elluminate *Live!* Recordings**.

The Steps:

1. Open the **Elluminate *Live!* Recording**.
2. Use the **Camtasia Recorder** to record the Elluminate recording. Use the following settings:
 - Select **Start a new project by recording the screen**.
 - Select **Region of the screen**.

- Input **Width: 640 pixels and Height: 480 pixels**.
 - Select **Record Audio**.
 - Select **Speaker Audio (what you hear)**.
3. Click **F9** or the **Record Button** and position the capture region around the content area.

4. Record the Elluminate recording.
5. Stop recording and on the **Post-Save Options** screen, select **Edit my recording** and click **OK**. Edit recording and add effects as desired.
6. Once you are satisfied with the recording, select **Produce video as...** and select **Custom production settings**.

For more information visit: www.lluminate.com

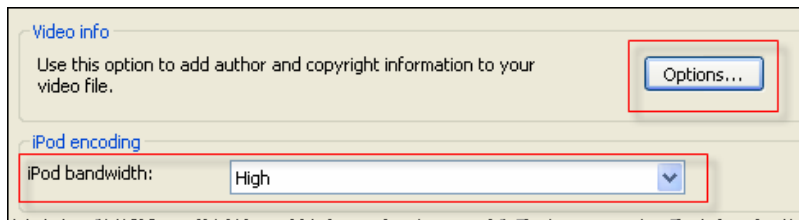

7. Select **iPod/iTunes – Specialized iPod/iTunes video format**. To create an audio podcast at the same time, select **Create MP3 File**.

Note: Camtasia and the Elluminate recording may battle for control of the audio. If you receive this Audio System Warning message when you start recording, select **No**.

8. Select Options to complete **Project Properties**.
9. Select **iPod Bandwith** and choose the desired bandwidth: low, medium or high.

10. Complete the **Production name** field and choose a **Folder** to save the file.
11. Click **Finish**. Camtasia Studio 4 will create the video podcast or MV4 file and the audio podcast or MP3 file. They are now ready for distribution.
